Analysis

A network diagram illustrating digital connectivity. It features twelve circular icons, each representing a different platform or service, arranged in a non-linear fashion. The icons include: Facebook (blue circle with white 'f'), YouTube (red circle with white 'You Tube' text), Twitter (light blue circle with white bird), Google+ (dark grey circle with white 'g+' text), a purple RSS icon, Instagram (brown circle with white camera icon), WhatsApp (green circle with white speech bubble and phone icon), Blogger (blue circle with white 'b'), LinkedIn (blue circle with white 'in'), a red Pinterest icon, an orange RSS icon, and a 'More' button (dark blue circle with white text). Dotted grey lines connect these icons in a complex, branching pattern, symbolizing the interconnected nature of digital networks.

Overview

OSINT Monitor allows organizations to track and gather information from a vast array of open sources and restores this real-time data into "noise-free" quality data for monitoring and analyzing to transform it into actionable business intelligence.

Features & Benefits

- * A fully flexible solution allowing data to be viewed at any time in any location
- * Easy to extract different social media profiles from single software
- * Collects live data from Twitter
- * Create your own database to save the information of your interest within seconds
- * Easily fetch news from individual or from different selected channels just with a keyword
- * Automated filtering of collected data
- * Instantly charts aggregated data in appropriate contexts
